

# FEWD Week #1 Project: HTML/CSS Basics

---

## Description

For the first assignment, you will begin creating the beginnings of your first website. Take what you've learned from class and build a portfolio site that showcases all of the projects you'll be completing over the next few weeks. Build two pages - an 'About Page' and a 'Portfolio' - that link to one another. Your 'About Page' should describe your mission and value proposition and your 'Portfolio' should include descriptions of the work you [will] do for Relaxr, Startup Matchmaker, and CitiPix.

Technical Requirements	Does Not Meet Expectations (0)	Meets Expectations (1)	Exceeds Expectations (2)
Link both pages together using <code>a</code> tag			
Use a unique <code>title</code> and a single unique <code>h1</code> tag			
Show images using <code>img</code> tags including unique <code>alt</code> attributes			
Use an external CSS stylesheet to style your pages			
Select at least 5 elements on the page and apply at least 5 different css properties ( <code>font-size</code> , <code>color</code> , <code>font-family</code> , <code>background</code> , <code>text-decoration</code> ) to these elements			
Use at least 6 different HTML tags ( <code>h1</code> , <code>h2</code> , <code>h3</code> , <code>h4</code> , <code>h5</code> , <code>h6</code> , <code>p</code> , <code>ul</code> , <code>ol</code> , <code>a</code> , <code>img</code> ) on your pages			
Follow naming conventions, maintain consistency across your <code>.html</code> and <code>.css</code> files			
Indent nested elements to increase your code's readability
